
Problems In Finsler Space

the geometry of finsler spaces - urząd miasta łodzi - the geometry of finsler spaces herbert busemann the term "finsler space " evokes in most mathematicians the picture of an impenetrable forest whose entire vegetation consists of tensors. the purpose of the present lecture is to show that the association of tensors (or differential forms) with finsler spaces is due to an **plateau's problem in finsler -space may 2, 2014 arxiv:1209 ...** - finsler 3-space, and prove higher regularity of solutions. free and semi-free geometric boundary value problems, as well as the douglas problem in finsler space can be dealt with in the same way. we also provide a simple isoperimetric inequality for minimal surfaces in finsler spaces. **volumes on normed and finsler spaces - msri** - volumes on normed and finsler spaces 3 despite these and other recent interdisciplinary results, we believe that the most surprising feature of the holmes{thompson definition is the way in which it organizes a large portion of convexity into a coherent theory. for example, the sharp upper bound for the volume of the unit ball of a normed space is **vol. 3, issue 6, june 2014 on a two dimensional finsler ...** - it is an interesting problem to find the fundamental function of a two dimensional finsler space whose geodesics constitute a given family of curves. m. matsumoto [5],[6],[8] obtained the fundamental function of a two dimensional finsler space whose geodesics are special conic sections. the aim of the present paper is to obtain the fundamental **an brief introduction to finsler geometry - math.aalto** - 1 finsler geometry essentially, a finsler manifold is a manifold M where each tangent space is equipped with a minkowski norm, that is, a norm that is not necessarily induced by an inner product. (here, a minkowski norm has no relation to indefinite inner products.) this norm also induces a canonical inner product. **on the l-duality of a finsler space with exponential metric** - also in recent the l-dual of a finsler space with special $(;)$ -metric and generalized matsumoto spaces have been introduced in [16, 17] . in this paper, we find the l-dual of a finsler space with an exponential metric $e =$, where g is riemannian metric and ω is a non-zero one form. 1 introduction
